

RGV-N-UN

4' UNFILTERED SHINGLE OVER RIDGE VENT WITH NAILS

RGV-N-UN TAKES RIDGE VENTILATION TO A NEW LEVEL OF PERFORMANCE.

The external baffle enhances airflow efficiency and shields the attic from weather intrusion, all while being simple to install. When you contrast its innovative design with other ridge vents, it's clear that RGV-N-UN stands out as the optimal choice for both roof performance and job site convenience. Its sleek, low-profile appearance seamlessly integrates with shingles, maintaining a neat roofline, while outperforming bulkier alternatives in ventilation effectiveness.
